

ARKAJYOTI BASU RAY

Data Analyst | SQL · Python · Power BI · AI Automation

Kolkata, West Bengal | arkajyotibasuray100@gmail.com | +91 70039 89324 | [GitHub](#) | [LinkedIn](#) | [Portfolio](#)

SUMMARY

Results-driven Data Analyst skilled in SQL, Python, Power BI, and cloud data platforms (Google BigQuery, AWS), with internship experience at ISRO and Internship Studio. Built an end-to-end automated data pipeline integrating SQL, Python, and LLM API automation to generate business reports from 14,500+ records. Delivered insights from 3.2M+ rows of data and built ETL pipelines handling 10,000+ records. Achieved 97% recall on predictive ML models and improved signal quality by 10% at ISRO. Seeking a full-time Data Analyst / Business Intelligence Analyst role to drive measurable business impact.

TECHNICAL SKILLS

- **Languages & Analysis:** Python (Pandas, NumPy, Scikit-Learn, SQLAlchemy), R, SQL (MySQL, PostgreSQL, BigQuery), Alteryx
- **Visualization & Cloud:** Power BI (DAX), Tableau, Matplotlib, Seaborn | Google BigQuery, AWS, Jupyter Notebooks
- **Automation & AI:** LLM API Integration, Automated Data Pipelines, ETL Development
- **ML & Techniques:** Logistic Regression, Classification, Feature Engineering, Statistical Analysis (SAS)

WORK EXPERIENCE

Range Operations Intern | ISRO

Sep 2025 – Oct 2025

- **Analysed** large-scale radar tracking datasets spanning **100–1,000+ km** ranges, improving data accuracy and resolution by **~15%** through systematic preprocessing and calibration techniques.
- **Processed 1,000+** data sessions and executed signal calibration workflows that enhanced signal-to-noise ratio (SNR) by **~10%**, directly supporting mission-critical decision-making.

Data Science Intern | iStudio

Jun 2025 – Aug 2025

- **Designed** and implemented an end-to-end **ETL data pipeline** that ingested, cleaned, and transformed **10,000+ records**, reducing data quality issues and enabling downstream analysis.
- **Engineered** predictive features and trained a Logistic Regression model using Scikit-Learn, achieving **85%** accuracy and cutting prediction errors by **20%**.

PROJECTS

Client Profitability Analytics – Automated AI reporting pipeline | SQL · Python · PostgreSQL · LLM API

- **Designed** a multi-table **SQL** rollup (CTEs) across **5 tables** and **14,500+** records to calculate net margin and fee realization for **40+** clients, then built an automated Python pipeline that flags the bottom **25%** on profitability using data-driven statistical thresholds.
- **Integrated** an **LLM API** to auto-generate report narratives while sourcing **100%** of report figures directly from the dataset, compiling results into a formatted Word deliverable – reducing analysis-to-report from **hours to under 1 minute**.

Cyclistic Rider Conversion Analysis | SQL · BigQuery · Power BI · DAX

- **Processed** and cleaned **3.2M+** rows of historical bike-share trip data using SQL in **Google BigQuery**, optimizing query performance and **Alteryx** for large-scale data processing.
- **Developed** an interactive **Power BI dashboard** with custom **DAX** measures identifying a **13%** summer ridership surge and revealing that casual riders average **2x** longer trip durations; formulated a **targeted member conversion strategy** based on behavioural segmentation.

EDUCATION

B.Tech – Electronics & Communication Engineering | Techno International Newtown

Aug 2026

CERTIFICATIONS

- Google Data Analyst Professional Certificate — Coursera (Jan 2026)
- Data Analytics Job Simulation — Deloitte (Aug 2025)
